1. Only use genuine keys.
2. Existing keys will be deleted when keys are programmed. If the existing keys are still required they must be re-programmed at the same time.
3. If the wrong pin code is entered, the tester will still say the key is programmed, even though it is not, as the vehicle does not give any indication that the pin is correct or incorrect.
4. Once a key is programmed into the vehicle the key can be duplicated.

PRECAUTIONS

IMPORTANT : PLEASE ENSURE ALL PRECAUTIONS ARE OBSERVED AS INDICATED AT THE FRONT OF THE OPERATING MANUAL.

IN PARTICULAR : For vehicles fitted with STOP/START technology, the battery leads must not be shorted together when the battery is disconnected as this can lead to damage to the car and potential personal injury.
